Company profiles

Hebei Beiren New Material Technology Co., Ltd

founded in 1999, the company currently has two plants, Beiren and Beihe, covering a total area of 320,000 square meters (79 acres), full purification workshop, GMP workshop 100,000 square meters (24.7 acres), and 1180 employees.

Has the international first-class equipment W & H flexo printing production line, bost double mode head double screw film machine, bridge Die-cutting machine, new Debao paper cup machine, feida folding box machine, etc. Is the leading brand in the domestic packaging industry, by the government. Government known as "high-end, intensive, energy saving, environmental protection" enterprises.

The W & H flexo printing production line

With 2 German W & H flexible production lines, 8 + 2 reverse printing, used for the production of paper products.

- Environmental protection performance is more superior
- Production capacity is more efficient
- Diversiof printing capabilities
- Higher-quality printing effect

Bost Lymphoners

In 2018, the investment of 41 million yuan, the introduction of Italian Bost double mode head double screw film machine, eye

There are already seven previous lymphatic membrane equipment.

Bridge die cutting machine

It has 5 die-cutting machine production lines, and the speed is 150 knife / min. The die cutting machine is made of roll paper

It can achieve from the roll paper die cutting, automatic counting and transportation, waste removal, to the finished product stacking

A series of actions. Solve the paper cup, paper bowl, paper plate mold after cutting clear waste difficult, labor problem, mention

High production efficiency of customers, reduce labor costs, for the follow-up intelligent workshop laid a good foundation.

Paper cup production line — New Debao paper cup machine

Our company purchased 50 new Debao machinery company DEBAO-138S automatic paper cup machine, speed

Degree can reach 200 per minute, producing more than 30 million paper cups per day. The paper cup machine is equipped with a detection device to automatic picking

In addition to the problem of paper cups, at the same time can realize automatic counting, automatic packaging, is a high-speed intelligent production line.

- **Carefully selected materials**

High quality raw pulp, selected as the shower film base paper material

- **Green, healthy and environmental protection**

Using pure primary fibrosis pulp, without fluorescent bleaching treatment, green, healthy, environmental protection.

- **High-temperature resistance, non-permeability**

The food grade PE film waterproof layer design is used, not only high temperature resistance 110°C, and 72 hours leakage

Plate and paper production line — cross-cutting machine

Our company has 28 plate paper production lines, a single layer of 120 meters per minute, daily production .Volume is 4.83 million meters.

Paper box production line — high-speed stereo box forming machine

Our company has 20 high-speed stereo box forming machine production line, the speed of 200/ Min, daily production capacity of 288,000 units.
